

24.6 Front Cover Hinge

Part number: S60-0460-12

Please note that the weight of the front cover is about 140 pound. When any parts inside the pump have to be replaced or the pump itself must be cleaned inside, it is necessary to take off the front cover.

If your pump was provided with a Front Cover Hinge, it will help to prevent any type of accident while removing the Front Cover.

***** It is recommended that each pump be equipped with a Front Cover Hinge. *****

**WHEN THE FRONT COVER HINGE IS ASSEMBLED ON THE PUMP,
THE PUMP HOUSING CANNOT BE TURNED ANYMORE!**
