

Drain Valve DN 6 TYPE 126

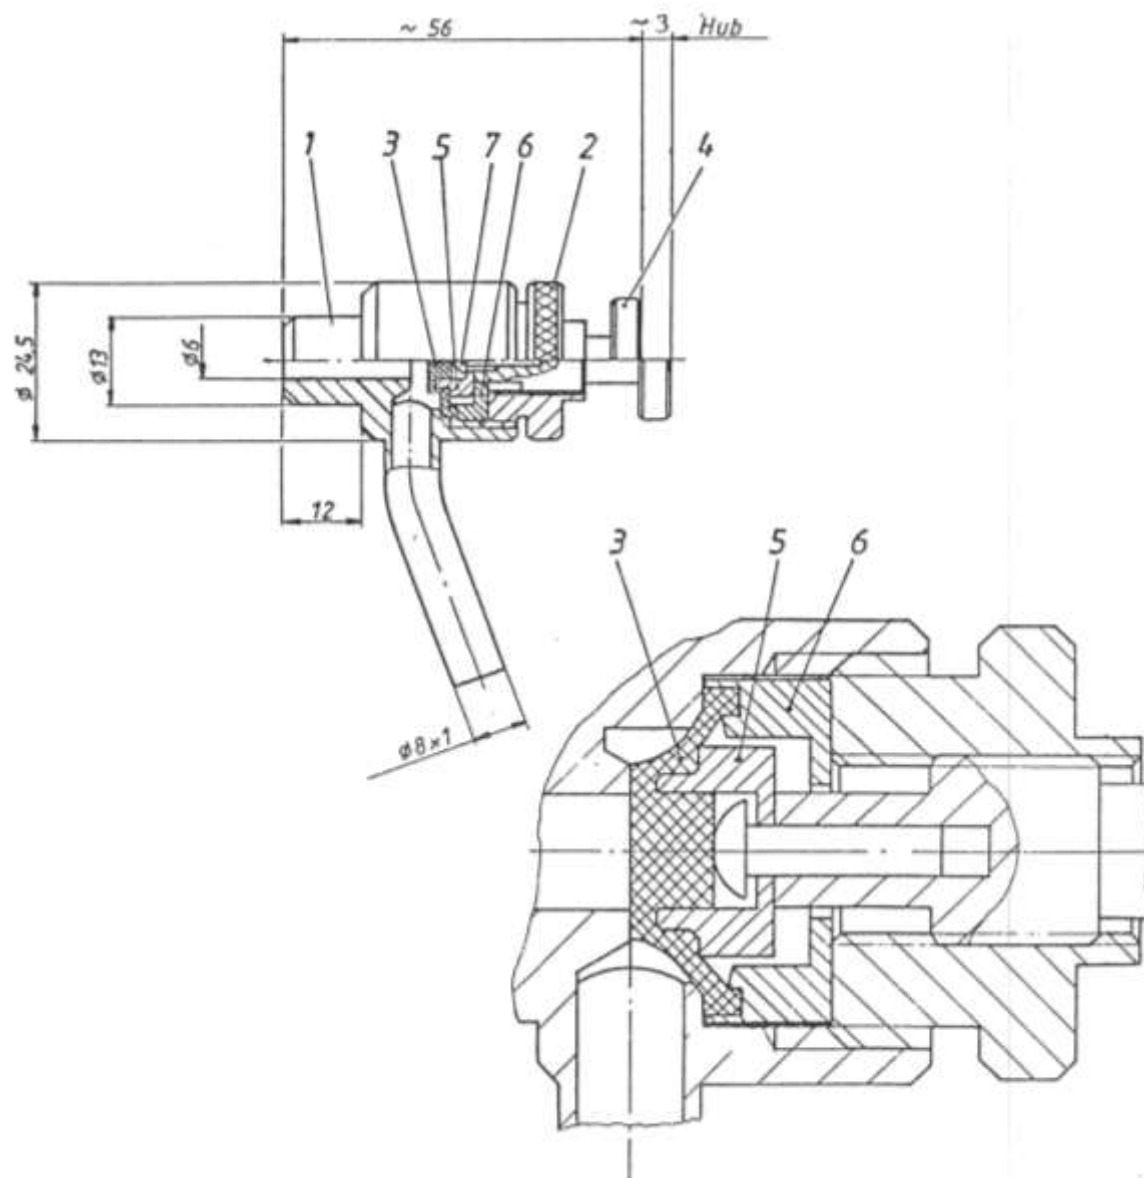

The aseptic drain valve made out of stainless steel with the convincing advantages:

-  strong compact membrane – for a long lifetime
-  small valve chamber – for an easy sterile maintenance
-  easy handling
-  easy assembly with a large variety of connecting possibilities

Materials:

Membrane	-	EPDM, FKM, Silicone or NBR
Housing	-	1.4571 / 316 TI
Valve Insert	-	1.4301 / 304

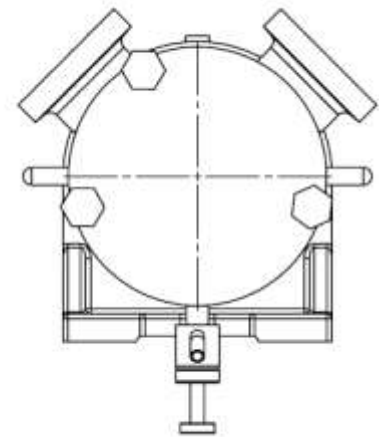

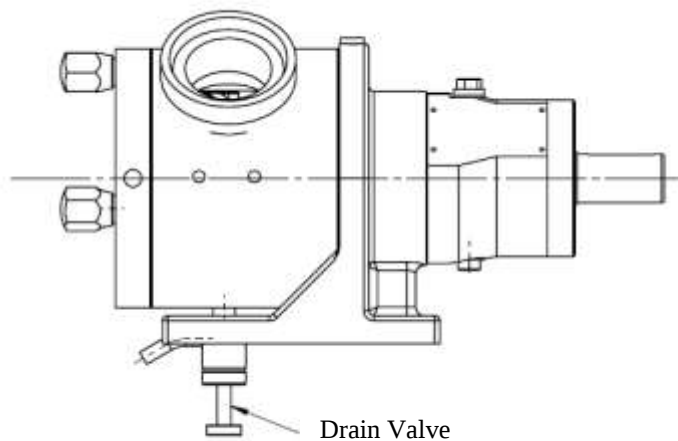

Dimensional drawing:

Parts lists:

7	Groove Pin	1.4301				126.814
6	Diaphragm plate	1.4301				126.813
5	Valve Piston	1.4301				126.812
4	Valve Rod	1.4301				126.811
3	Membrane	EPDM 126.801	FKM 126.802	Silicone 126.803	NBR 126.804	
2	Top of Valve	1.4301				126.810
1	Valve Housing	1.4571				126.010
No.	Part Name	Materials				Drawing-No. / Part No.

Examples:

Caution:

The position of the connection can't be changed any more when a drain valve is installed.

Alternative:

Pneumatic drain valve – spring closing / pressure opening

with or without
electrical situation feedback
